<p>The chart displays daily precipitation heights from January 1st to December 31st. The y-axis represents precipitation in mm, ranging from 0.0 to 50.0. The x-axis shows the days of the year (1 to 365). Blue bars represent individual daily precipitation values, which are highly variable, peaking around 40 mm in early January and again in late July. A red dashed line represents the cumulative maximum daily precipitation reached each day, showing a sharp peak in early January followed by a general decline throughout the year.</p>
